PROFESSIONAL SUMMARY

Senior Product Designer with 7+ years designing complex B2B products for professional users, 4 of them in EV and energy infrastructure. Designs data-dense admin tools and native apps that surface hardware status, failures and next steps for people who are not data analysts. Grounds decisions in research with the people doing the work, treats failure and recovery as designed states, and works comfortably as a solo designer. Took station activation from a 5 day specialist-run process to 4 minute self-serve in beta. Designs and ships in code with AI. German: A1, actively learning.

PROFESSIONAL EXPERIENCE

ChargePoint Austria GmbH | April 2025 - June 2026
UX/UI Designer (Design Lead, Activation & Installer native app)

- **End-to-end Ownership:** Owned the activation feature as sole designer across the enterprise admin platform and native Installer app, for a network of 1.3M+ charging ports. Replaced a 5-day specialist-led workflow with a 4-minute guided wizard (beta), saving an estimated 2,000+ specialist hours a year.
- **Research into Decisions:** Ran 30+ interviews with customers and internal stakeholders after MVP, which reshaped the roadmap toward bulk activation and error recovery. Shipped 4 tested iterations in a year.
- **Error Recovery:** Research showed customers needed to know what was wrong and how to fix it, not just a faster wizard. Designed 3 hard blocks that catch hardware problems before activation, with clear fixes when it fails, cutting activation support tickets by 40%.
- **Delivery & Hiring:** Wrote acceptance criteria and ran design QA on every dev build, catching 40+ defects pre-release. Defined hiring criteria and ran technical design interviews as the team grew from 6 to 10.

The Mobility House, Munich | October 2022 - December 2024
UX/UI Designer

- **Design System:** Co-led DesignGrid, a web and mobile component library, which cut feature development time by 80%. Ran the workshops that aligned product and engineering.
- **Parity & Accessibility:** Kept the shipped library in parity with Figma through visual regression reviews, with every component built to WCAG 2.1 AA and EAA. In field testing, electricians completed tasks 50% faster than with the paper protocol.
- **Product Work:** Designed ChargePilot admin features (firmware updates, reports, user management) and led full-cycle UX for the ChargePilot Installer native app, letting installers commission sites themselves and reducing commissioning errors and site revisits.

Career Break | July 2021 - September 2022

- **Upskilling:** Relocated to Germany and completed the Google UX Design Professional Certificate.

Sonata Software, Simar Corp, Shriya, WowExp, Bengaluru | January 2017 - June 2021
UI/UX Designer

- **Social Impact:** Designed CoCreate, a platform for 30,000+ women artisans (Sonata).
- **E-commerce:** Redesigned checkout for +22% conversion (Simar).
- **AI Product:** Built a virtual try-on app with ML engineers (WowExp).
- **Leadership:** Mentored 2 interns and took part in hiring.

CORE SKILLS

Product Design: End-to-end product design, user flows, wireframing, prototyping, high-fidelity UI, information architecture, design systems, role-based permissions, data-dense interfaces, UX writing, accessibility (WCAG 2.1 AA, EAA)
Research & Delivery: User research, usability testing, UAT, Hotjar, design QA, cross-functional collaboration, Agile, native iOS and Android
AI & Tools: Claude (agentic workflows, custom skills), Figma Make, GitHub, Figma (Variables, Advanced Prototyping), Storybook, Chromatic, FigJam, Jira, Confluence, Miro

EDUCATION & CERTIFICATES

Google UX Design Professional Certificate | Google, September 2022
Bachelor of Science in Fashion and Apparel Design | Vogue Institute of Fashion Technology, 2009 - 2012
