

Seema Jain

Senior Product Designer | B2B SaaS, Native Mobile & Design Systems

Salzburg, Austria (open to relocation) | seemasam2113@gmail.com

Portfolio: www.seema-jain.com | LinkedIn: [linkedin.com/in/seema-sampathraj](https://www.linkedin.com/in/seema-sampathraj)

PROFESSIONAL SUMMARY

Senior Product Designer with 7+ years in complex B2B SaaS and native mobile, owning features from problem statement to shipped interface across research, flows, interaction and visual design. Built and maintained a production design system from zero as sole designer. Runs qualitative research first-hand and turns it into prioritised design decisions. Works AI-first: Figma Make for concept generation, AI-assisted research synthesis, and Claude for critique and for designing and shipping www.seema-jain.com end to end.

PROFESSIONAL EXPERIENCE

UX/UI Designer | ChargePoint Austria GmbH

April 2025 - June 2026

- **Features End to End:** Owned station activation from problem statement through research, flows and interface to shipped result, across an enterprise SaaS admin platform and a native mobile app (iOS and Android), serving org admins, deployment specialists and NOC operators.
- **Research into Decisions:** Ran 30 qualitative interviews and usability and UAT rounds with field electricians and enterprise administrators, and mapped the journey across both platforms to locate the highest-friction moments before designing.
- **Outcomes:** Replaced a specialist-run process with a self-serve wizard, targeting same-day activation against a 3 to 5 day baseline and eliminating an estimated 40% of CX activation tickets.
- **Designing for Failure:** Surfaced hidden hardware failures (uncommissioned stations, offline gateways, pending GPS) as pre-activation blockers with designed recovery paths, saving CX about one support ticket every other day.
- **AI-Accelerated Delivery:** Used Figma Make to generate and pressure-test concepts with stakeholders, cutting concept-to-decision time from one week to a day, and synthesised interview transcripts with Microsoft Copilot.
- **Engineering Collaboration:** Wrote acceptance criteria engineering built from directly, and reviewed built components in Storybook against Figma to catch spacing and state deviations before release. Defined hiring criteria and ran technical design interviews.

UX/UI Designer | The Mobility House, Munich

October 2022 - December 2024

- **Design System Ownership:** Designed and launched DesignGrid from zero as sole designer, a component library spanning web and mobile, and ran the workshops that aligned product and engineering on the system, ways of working and Figma setup.
- **Design to Code Parity:** Reviewed Chromatic visual regression diffs on every component change, approving or rejecting snapshots so the shipped library stayed in parity with Figma and drift was caught before release.
- **Accessibility:** Built every component to WCAG 2.1 AA and European Accessibility Act requirements, with contrast, focus states, target sizes and screen reader semantics defined at component level.
- **Product Work:** Designed ChargePilot admin platform features (firmware updates, reports, user management) and led full-cycle UX for the ChargePilot Installer, a native app that let installers commission sites themselves, reducing commissioning errors and site revisits.

Career Break

July 2021 - September 2022

Relocated to Germany and completed the Google UX Design Professional Certificate.

UI/UX Designer | Sonata Software, Simar Corp, Shriya, WowExp | Bengaluru

January 2017 - June 2021

- **Outcomes:** Redesigned checkout at Simar Corp, lifting conversion by 22%. Designed CoCreate at Sonata Software, a platform that gave 30,000+ women artisans direct access to bring products to market, including roles, permissions and org management.
- **Technical Collaboration:** Designed a virtual try-on app at WowExp alongside ML and data science engineers. Mentored two design interns and took part in hiring at Sonata Software.

CORE SKILLS

Product Design: End-to-end ownership, B2B SaaS, native mobile (iOS and Android), data-heavy interfaces, information architecture, interaction and visual design, UX writing, prototyping, legacy system modernisation

Design Systems: Design system ownership from zero, component libraries, Storybook, Chromatic, visual regression testing, white-labelling, accessibility (WCAG 2.1 AA, EAA)

AI: Figma Make, Claude (agentic workflows, custom skills, critique), Microsoft Copilot, AI-assisted research synthesis, GitHub

Research: User interviews, journey mapping, usability testing, UAT, qualitative and quantitative research, Hotjar

Tools: Figma (Variables, Advanced Prototyping), FigJam, Jira, Confluence, Miro, Appcues, Lucidchart, Adobe Creative Suite

EDUCATION & CERTIFICATES

Google UX Design Professional Certificate | Google, September 2022

Bachelor of Science in Fashion and Apparel Design | Vogue Institute of Fashion Technology, 2009 - 2012
