

Seema Jain

Senior Product Designer | B2B Enterprise SaaS & Native Mobile

Salzburg, Austria (open to relocation | EU Blue Card) | seemasam2113@gmail.com

Portfolio: www.seema-jain.com | LinkedIn: [linkedin.com/in/seema-sampathraj/](https://www.linkedin.com/in/seema-sampathraj/)

Professional summary

Senior Product Designer with 7+ years in data-heavy B2B SaaS and multi-portal platforms, turning dense technical data into interfaces people can act on. Full-cycle owner from discovery through delivery, design QA and post-release iteration. Runs qualitative user interviews first-hand and turns transcripts into prioritised design decisions. AI-native in delivery: uses Figma Make to pressure-test concepts with stakeholders before committing to high fidelity, AI-assisted synthesis on research at interview scale, and ships working prototypes in code.

Professional experience

UX/UI Designer | ChargePoint Austria GmbH

April 2025 - June 2026

- **Design Lead, Station Activation:** Led design for station activation end to end across two connected platforms serving distinct user groups, a B2B mobile app (iOS and Android) for field electricians and a SaaS web platform for enterprise administrators, unified into a single coherent journey.
- **User Research & Discovery:** Ran 30 qualitative interviews with field electricians and enterprise administrators, synthesised transcripts into themes using Microsoft Copilot, and created journey maps across both platforms to locate the highest-friction moments before any screen was designed.
- **Self-Serve Activation:** Designed a self-serve activation wizard for org admins to replace a specialist-run process, removing the dependency on ChargePoint deployment specialists, targeting same-day activation against a 3 to 5 day baseline and eliminating an estimated 40% of CX activation tickets.
- **Failure Recovery:** Moved hidden hardware failures (uncommissioned stations, offline gateways, pending GPS) upstream into pre-activation blockers, saving CX roughly one support ticket every other day.
- **AI-Accelerated Exploration:** Used Figma Make to generate and pressure-test early concepts for the field-electrician app with stakeholders before committing to high fidelity, reducing concept-to-decision time from one week to a day.
- **Full-Cycle Delivery in Sprints:** Drove design from discovery through design QA and post-release iteration in sprints, writing acceptance criteria for engineering and reviewing built components in Storybook against Figma to catch spacing, state and token deviations before release.
- **Design Hiring & Quality Bar:** Defined hiring criteria and ran technical design interviews, scaling the design team from 6 to 10 while holding the quality bar.

UX/UI Designer | The Mobility House, Munich

October 2022 - December 2024

- **Cross-Platform Design System:** Designed and launched DesignGrid, a component library spanning web and mobile with shared interaction patterns across teams, reducing new feature development time by 80%. Reviewed Chromatic visual regression diffs on every component change, approving or rejecting snapshots so the shipped library stayed in parity with the Figma source of truth and visual drift was caught before release rather than in production.
- **Accessibility by Default:** Built every component to WCAG 2.1 AA and European Accessibility Act requirements, with colour contrast, focus states, target sizes and screen reader semantics defined at component level rather than retrofitted screen by screen.
- **Field-to-Platform Integration:** Led full-cycle UX for the ChargePilot Installer, a native mobile app that let installers commission sites themselves instead of calling support, reducing commissioning errors and site revisits, and defined the data handoff contract between field hardware and the enterprise admin platform.
- **Embedded Delivery:** Collaborated with distributed PM and engineering teams across a remote-first environment, driving design from discovery through high-fidelity handoff and post-launch iteration on complex, data-heavy B2B workflows.

Career Break

July 2021 - September 2022

Relocated to Germany and completed the Google UX Design Professional Certificate.

Earlier UI/UX Designer, Bengaluru

January 2017 - June 2021

- Design roles at **Sonata Software, Simar Corp, Shriya Creative Illusions and WowExp Technologies** across consumer marketplace UI, white-labelled enterprise SaaS themes and mobile commerce, including CoCreate, a collaborative product-development platform that gave 30,000+ women artisans direct access to bring products to market.

Core skills

Product Design: End-to-End Product Design (Web & Mobile), Multi-Platform Design, B2B SaaS, iOS & Android, Information Architecture, UX Writing, Visual Design, prototyping, wireframing, user flows, responsive design, cross-functional collaboration, mentoring, design tokens, legacy system modernisation, Accessibility (WCAG 2.1 AA, European Accessibility Act / EAA)

Design Systems: Design System Architecture, Component Libraries, Storybook, Chromatic, Visual Regression Testing, White-Labeling

AI & Agentic Workflow: Figma Make (generative screen exploration), AI-assisted research synthesis and design critique, Claude (agentic workflows, custom skills, prompt-driven build-review-iterate loops), GitHub, Microsoft Copilot

Delivery & Ownership: Full Cycle Design Ownership, Design QA, Jira Ticket Management, Embedded Team Collaboration, Agile / Remote-First Workflows

Research & Validation: User Acceptance Testing (UAT), Usability Testing, Qualitative & Quantitative Research, Product Analytics (Hotjar), Stakeholder Management

Tools: Figma (Variables, Advanced Prototyping), Adobe Creative Suite, Jira, Confluence, Hotjar, Appcues, Lucidchart, FigJam, Miro

Education & certificates

Google UX Design Professional Certificate | Google

September 2022

Bachelor of Science in Fashion and Apparel Design | Vogue Institute of Fashion Technology

June 2009 - May 2012
