

Seema Jain

Senior Product Designer | B2B Enterprise SaaS & Native Mobile

Salzburg, Austria (open to relocation | EU Blue Card) | seemasam2113@gmail.com

Portfolio: www.seema-jain.com | LinkedIn: linkedin.com/in/seema-sampathraj/

Professional summary

Senior Product Designer with 7+ years in data-heavy B2B SaaS and multi-portal platforms, turning dense technical data into interfaces people can act on. Full-cycle owner from discovery through delivery, design QA and post-release iteration. Runs qualitative user interviews first-hand and turns transcripts into prioritised design decisions. AI-native: designs and ships in code, having built and deployed www.seema-jain.com end to end with Claude, deployed via GitHub, and uses Figma Make for rapid concept exploration.

Professional experience

UX/UI Designer | ChargePoint Austria GmbH

April 2025 - June 2026

- **Multi-Platform Product Design:** Owned end-to-end design across two connected platforms serving distinct user groups, a B2B mobile app (iOS and Android) for field electricians and a SaaS web platform for enterprise administrators, unified into a single coherent journey.
- **User Research & Discovery:** Ran 30 qualitative interviews with field electricians and enterprise administrators, synthesised transcripts into themes using Microsoft Copilot, and mapped the end-to-end journey across both platforms to locate the highest-friction moments before any screen was designed, cutting down the team effort to a third and reducing activation from **a week on average to a few minutes a day**.
- **AI-Accelerated Exploration:** Used Figma Make to generate and pressure-test early concepts for the field-electrician app with stakeholders before committing to high fidelity reducing concept-to-decision time from one week to a day.
- **Full-Cycle Delivery in Sprints:** Drove design from discovery through high-fidelity delivery, design QA and post-release iteration inside product and engineering sprints, authoring acceptance criteria used directly by engineering, and reviewing built components in Storybook against the Figma library to catch spacing, state and token deviations before release.
- **Design Hiring & Quality Bar:** Defined hiring criteria and ran technical design interviews, scaling the design team from 6 to 10 while holding the quality bar.

UX/UI Designer | The Mobility House, Munich

October 2022 - December 2024

- **Cross-Platform Design System:** Designed and launched DesignGrid, a component library spanning web and mobile, establishing shared token architecture and interaction patterns across teams, reducing new feature development time by 80%. Reviewed Chromatic visual regression diffs on every component change, approving or rejecting snapshots so the shipped library stayed in parity with the Figma source of truth and visual drift was caught before release rather than in production.
- **Accessibility by Default:** Built every component to WCAG 2.1 AA and European Accessibility Act requirements, with colour contrast, focus states, target sizes and screen reader semantics defined at token and component level rather than retrofitted screen by screen
- **Field-to-Platform Integration:** Led full-cycle UX for a self-service native mobile installer app, defining the data handoff contract between on-site field hardware and an enterprise SaaS admin platform - removing the need for internal deployment specialists for standard installations and reducing implementation costs by 27%.
- **Embedded Delivery:** Collaborated with distributed PM and engineering teams across a remote-first environment, driving design from discovery through high-fidelity handoff and post-launch iteration on complex, data-heavy B2B workflows.

Professional experience (continued)

Earlier UI/UX Designer, Bengaluru

January 2017 - June 2021

- **Design roles at Sonata Software, Simar Corp, Shriya Creative Illusions and WowExp Technologies** across consumer marketplace UI, white-labelled enterprise SaaS themes and mobile commerce, including CoCreate, a collaborative product-development platform that gave 30,000+ women artisans direct access to bring products to market.

Core skills

Product Design: End-to-End Product Design (Web & Mobile), Multi-Platform Design, B2B SaaS, iOS & Android, Information Architecture, UX Writing, Visual Design, prototyping, wireframing, user flows, responsive design, cross-functional collaboration, mentoring, design tokens, legacy system modernisation, Accessibility (WCAG 2.1 AA, European Accessibility Act / EAA)

AI & Agentic Workflow: Claude (agentic workflows, custom skills, prompt-driven build-review-iterate loops, designed and shipped own portfolio site), Figma Make (generative AI screen exploration), AI-assisted research synthesis and design critique, GitHub, Microsoft Copilot

Design Systems: Design System Architecture, Component Libraries, Cross-Platform Design Tokens, Storybook, Chromatic, Visual Regression Testing, White-Labeling

Delivery & Ownership: Full Cycle Design Ownership, Design QA, Jira Ticket Management, Embedded Team Collaboration, Agile / Remote-First Workflows

Research & Validation: User Acceptance Testing (UAT), Usability Testing, Qualitative & Quantitative Research, Hotjar, Stakeholder Management

Tools: Figma (Variables, Advanced Prototyping), Adobe Creative Suite, Jira, Hotjar, Appcues, Lucidchart, FigJam, Miro

Education & certificates

Google UX Design Professional Certificate | Google

September 2022

Bachelor of Science in Fashion and Apparel Design

June 2009 - May 2012

| Vogue Institute of Fashion Technology
